Art Unit: 1637

1. The disclosure is objected to because of the following informality: the subparts (i.e., panels A, B, C, etc.) of the drawings are not properly referred to in the Description section as "Figs. 1A and 1B", for example.

Appropriate correction is required.

2. Claims 41-49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A) Claim 41 is confusing because "the primer" lacks proper antecedent basis (claim 34 recites "two primers").

B) Claims 42-49 are confusing because "the single stranded DNA molecule" in claim 42, line 3, lacks proper antecedent basis. The preamble of claim 42 refers to "a single stranded nucleic acid molecule".

C) Claim 48 is further confusing because "the double stranded DNA molecule" lacks proper antecedent basis. Claim 42 recites a "single stranded" molecule.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 34-58 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-62 of US Patent No. 6,225,092. Although the conflicting claims are not identical, they are not patentably

distinct from each other because the '092 claims and the instant claims are related as species-genus.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 34-58 are rejected under 35 U.S.C. 102(e) as being anticipated by Koster et al. (US 5,928,906).

As discussed in the preliminary amendment filed 01/08/2001, applicant has essentially copied the claims in the Koster et al. patent in order to request an interference.

In responding to this rejection, applicant is directed to M.P.E.P. 2308, 2308.01, and 2308.02, and to 37 CFR 1.608(b).

5. No claims are free of the prior art.
